

Mobile App Project Proposal

Alexander Cushing
James Erardi
TJ Tracy

What our app will do

Our app will allow users to write and send delayed text messages.

Users will be able to create, delete, and update delayed texts.

Users will be able to check their history of sent delayed texts.

Users will be able to create repeating delayed texts.

Motivation to make it

This is an idea that we all believe we would use.

It has many use cases - reminders, cycling delayed messages, delayed group messages

Interested in technologies - twilio for texting.

Similar apps that **aren't** enough

Bad UI, Out of Date, No active developers or updates

Text Later

Message Delay Express

Planned features

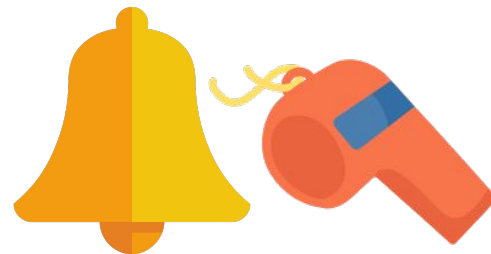

Delayed text message

Delayed group texts

Repeating delayed texts (Every monday at noon etc)

History of delayed texts

Edit, Delete delayed texts

Our responsibilities

Activities - Thomas

Fragments - Alex

Database - James, sqllite & postgres

Networking - James, flask or express (not yet decided)
